

Bluesocket and Perket Technologies Align to Ease Wireless LAN Management for Fortune 2000 Companies

IT Security Services Firm becomes a Platinum Partner of WLAN Management and Security Leader

BURLINGTON, Mass – April 8, 2006 – **Bluesocket Inc.**, (www.bluesocket.com) the leading vendor of products that secure and manage Wi-Fi networks, today announced that it has signed Atlanta -based Perket Technologies, as a Platinum Partner to sell and support its WLAN product line.

Perket Technologies, (www.Perket.com) has developed a reputation for providing their clients with high-quality, cost-effective, customer service oriented information system solutions. They are committed to helping their clients succeed by providing them with unique solutions for their information needs. Their team of dedicated consultants is comprised of programmers, designers, researchers and IT professionals whose breadth of experiences and expertise ensures that there is not a client that they cannot help. Their consultants are experienced in a wide array of information technology, consulting, business process management, financial and engineering services, and work to make each client more productive and efficient through the implementation of unique information system solutions.

"Perket's pursuit for the industry's leading wireless LAN solutions was immediately fulfilled when we evaluated the Bluesocket product family," said Carolyn Keane, CEO of Perket Technologies. "The announcement of Perket's comprehensive Wireless Security Solutions were dependent upon partnering with the best-of-breed WLAN solution to complement our existing partners and wireless service offerings. We're looking forward to introducing Bluesocket's technology to our current and future client base."

"Perket's breadth of services, from consultation to system design and integration; testing and training, combined with Bluesocket's WLAN technology will introduce a new level of WLAN security management to customers," said James Funucane, Vice President of Engineering, Bluesocket. "Perket's value is proven in the market and among its existing customer portfolio, and is why Bluesocket invited them to join our elite group of Platinum Partners. Bluesocket is pleased to join its team in an effort to improve security, quality of service and management issues facing enterprises that deploy wireless LANs." Bluesocket Wireless Gateways offer scalable, single component solutions for administration, management, class of service (CoS) and security of 802.11 b, a, g; wireless networks for enterprises and service providers. Configured via a Web browser, the Wireless Gateway sits between an enterprise's access points (wireless base stations) and the rest of the network, acting as a gateway between wireless and wired components.

About Perket Technologies

Perket Technologies was founded to fulfill clients' needs for individualized solutions for their information needs. These solutions are developed through extensive consultation between the clients and the design engineers at Perket Technologies.
